## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-15 and 21-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The support for the newly added limitation of in claim 1, "withdrawing portion of the fluid slurry as an intermediate product at a slurry withdrawal location in the loop reaction zone where in intermediate product contains a higher concentration of the solid polyolefin particles than an average concentration of the solid polyolefin particles the fluid slurry in the loop reactions zone", is neither identified by the applicants nor found by the examiner in the application as originally filed. The newly added limitation is now matter.

### ***Claim Rejections - 35 USC § 102***

3. Claims 1-15 and 21-27 are rejected under 35 U.S.C. 102(E) as being anticipated by Kendrick et al. (US 2002/0173598 A1).

In claims 161 and 162 of page 17, Kendrick claims a polymerization process in a loop reactor comprising feeding the catalyst into the reactor from multiple inlets, feeding monomer, comonomer, diluent and other additives to the reactor through multiple feed

Art Unit: 1713

inlets, and discharging the polymer slurry intermediate product through at least two discharge conduits; wherein the feed inlets are symmetrically arranged around the reactor and the reaction kinetics are maintained constant. The multiple feed inlets and multiple discharge conduits are demonstrated in Figs. 5 and 6 with explanations in paragraphs [0064] and [0065] on page 6, and paragraphs [0071] on page 7. Kendrick teaches that the discharging slurry intermediate product has a higher weight percentage of polymer solids than the weight percentage of solids in the circulating slurry in the reactor (paragraphs [0026] and [0027]), the difference of the reactant monomer concentrations, measured in wt.%, taken at any two points along the loop reactor is within 20% of the higher value (paragraph [0063]). The range of ethylene concentration of Kendrick's Example 3 and 4 are 0.4 and 1.0 wt.% respectively.

Kendrick's teaching encompasses the instant claims.

Similar rejections are also applied to the teaching of Kendrick et al. (US 2003/0161765 A1), see Fig. 5 and 6, paragraphs [0028], [0029] and [0074] to [0082].

### ***Response to Arguments***

4. Applicant's arguments with respect to the rejected claims over the cited prior art have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1713

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
